

EXPORT COMPLIANCE STATEMENT

Date: «FILL IN DATE»
Product: Balcony for iOS
Bundle identifier: com.balcony.ios
Responsible party: Marko Radak
Contact email: mail@markoradak.com

1. ENCRYPTION FUNCTIONALITY

Balcony establishes an end-to-end encrypted channel between a paired macOS host and an iOS client in order to transport Claude Code session data (terminal output and transcripts). The application implements the following standard, published cryptographic algorithms by way of the libsodium library:

- X25519 (Curve25519) for Diffie-Hellman key agreement (IETF RFC 7748)
- XChaCha20-Poly1305, 256-bit, for authenticated symmetric encryption (IETF RFC 8439 and draft-irtf-cfrg-xchacha)

These are standard algorithms accepted by international standards bodies. The application does NOT implement proprietary or non-standard cryptography, and does NOT expose an open cryptographic interface.

2. EXPORT CLASSIFICATION

Under the U.S. Export Administration Regulations (EAR), this product is classified as:

ECCN: 5D992.c (mass-market encryption software)
Authorization: License Exception ENC, 15 CFR Section 740.17(b)(1)

The product qualifies as mass-market encryption software and has been self-classified accordingly.

3. SELF-CLASSIFICATION REPORT

A self-classification report covering this product has been submitted to the U.S. Bureau of Industry and Security (crypt-supp8@bis.doc.gov) and to the National Security Agency (enc@nsa.gov), in accordance with 15 CFR Section 742.15(b), on «FILL IN DATE FILED».

4. STATEMENT

The information set out above is accurate and complete to the best of my knowledge.
